Weekly Study Digest

June 1 – June 7, 2026

15 Questions . Detailed Solutions with Shortcuts

Topic Analysis

- 1. Topics Covered - Social studies, mathematics, language, science
 - Migration, measurement, linguistics, literacy, probability
- 2. Difficulty Breakdown - 40% easy, 30% medium, 30% hard
- 3. Key Concepts - Understanding definitions, problem-solving
- 4. Common Mistakes - Misunderstanding terms, calculation errors
- 5. Study Tips - Review definitions, practice problem-solving

&i Quick Reference

- 6. Key Formulas & Shortcuts -
 - Perimeter of a triangle: $P = a + b + c$
 - Solving linear equations: isolate variable
- 7. Weekly Strategy - Focus on understanding key terms and concepts in social studies and mathematics

Environmental Studies

- 1 What is the term for the movement of people from one place to another in search of food, water, or shelter?
- ☒ A. Migration

☐ B. Immigration

☐ C. Emigration

☐ D. Hibernation

Correct: A

Detailed Solution

The term 'migration' refers to the movement of people from one place to another in search of food, water, or shelter, and is a common phenomenon in both human and animal populations.

Mathematics

2

What is the concept of measurement in mathematics?

- ☒ A. The process of assigning numbers to quantities
- ☐ B. The process of solving equations and inequalities
- ☐ C. The process of graphing functions and relations
- ☐ D. The process of calculating perimeter and area

' Correct: A

Detailed Solution

Measurement in mathematics refers to the process of assigning numbers to quantities, which can include factors such as length, mass, and time.

Language

3

What is the term for the study of the relationship between language and society?

- ☒ A. Sociolinguistics
- ☐ B. Psycholinguistics
- ☐ C. Neurolinguistics
- ☐ D. Anthropological linguistics

' Correct: A

Detailed Solution

The term 'sociolinguistics' refers to the study of the relationship between language and society, including how language varies across different social contexts and how it is used to convey social meaning.

Environmental Studies

4

What is the term for the movement of people from one place to another?

- ☒ A. Migration
- ☐ B. Immigration
- ☐ C. Emigration
- ☐ D. Transportation

' Correct: A

Detailed Solution

Migration refers to the movement of people from one place to another, which can be voluntary or involuntary, and can have significant impacts on the environment and ecosystems.

Language

5

What is the term for the process of learning to read and write?

- ☐ A. Language acquisition
- ☒ B. Literacy
- ☐ C. Vocabulary development
- ☐ D. Grammar instruction

' Correct: B

Detailed Solution

The term 'literacy' refers to the process of learning to read and write, as well as the ability to use language to communicate effectively.

Language

6

What is the term for the study of the meaning of words and phrases?

- ☒ A. Semantics
- ☐ B. Syntax
- ☐ C. Pragmatics
- ☐ D. Morphology

' Correct: A

Detailed Solution

The term 'semantics' refers to the study of the meaning of words and phrases, and is a key concept in understanding how language conveys meaning and communicates ideas.

Language

7

What is the term for the process of using prior knowledge and experience to make inferences and draw conclusions?

- ☐ A. Critical thinking
- ☐ B. Creative thinking
- ☒ C. Inferential thinking
- ☐ D. Analytical thinking

' Correct: C

Detailed Solution

Inferential thinking refers to the process of using prior knowledge and experience to make inferences and draw conclusions, which is an essential skill for language development and comprehension.

Mathematics

8

What is the concept of probability in mathematics?

- ☒ A. The measure of the likelihood of an event occurring
- ☐ B. The measure of the frequency of an event occurring
- ☐ C. The measure of the magnitude of an event occurring
- ☐ D. The measure of the duration of an event occurring

' Correct: A

Detailed Solution

Probability in mathematics refers to the measure of the likelihood of an event occurring, which can be expressed as a numerical value between 0 and 1.

Mathematics

9

What is the value of x in the equation $2x + 5 = 11$?

- ☐ A. 2
- ☒ B. 3
- ☐ C. 4
- ☐ D. 5

' Correct: B

Detailed Solution

To solve for x , we need to isolate x on one side of the equation. Subtracting 5 from both sides gives $2x = 6$, and then dividing both sides by 2 gives $x = 3$.

Environmental Studies

10 What is the term for the variety of different species that live in an ecosystem?

- ☒ A. Biodiversity
- ☐ B. Ecosystem
- ☐ C. Habitat
- ☐ D. Population

' Correct: A

Detailed Solution

The term 'biodiversity' refers to the variety of different species that live in an ecosystem, and is a key concept in understanding the importance of conservation and sustainability.

Language

11 What is the term for the process of using vocabulary and terminology to convey meaning and context?

- ☒ A. Semantic field
- ☐ B. Syntactic structure
- ☐ C. Pragmatic function
- ☐ D. Discourse analysis

' Correct: A

Detailed Solution

Semantic field refers to the process of using vocabulary and terminology to convey meaning and context, which is an essential aspect of language development and communication.

Environmental Studies

12 What is the main source of energy for the Earth's climate system?

- ☒ A. The sun
- ☐ B. The Earth's core
- ☐ C. The atmosphere
- ☐ D. The oceans

' Correct: A

Detailed Solution

The main source of energy for the Earth's climate system is the sun, which provides the energy that drives the Earth's climate and weather patterns.

Mathematics

13 What is the concept of pattern recognition in mathematics?

- ☒ A. The ability to identify and extend a sequence of numbers or shapes
- ☐ B. The ability to solve equations and inequalities
- ☐ C. The ability to graph functions and relations
- ☐ D. The ability to calculate perimeter and area

' Correct: A

Detailed Solution

Pattern recognition in mathematics refers to the ability to identify and extend a sequence of numbers or shapes, which is an essential skill for problem-solving and critical thinking.

Mathematics

14 What is the formula for finding the perimeter of a triangle?

- ☒ A. $a + b + c$
- ☐ B. $a - b - c$
- ☐ C. $a \times b \times c$
- ☐ D. $a / b / c$

' Correct: A

Detailed Solution

The perimeter of a triangle is found by adding the lengths of all three sides, which is represented by the formula $a + b + c$.

Environmental Studies

15 What is the main function of the roots of a plant?

- ☒ A. To absorb water and nutrients from the soil
- ☐ B. To produce food through photosynthesis
- ☐ C. To transport water and nutrients to the leaves
- ☐ D. To protect the plant from disease and pests

' Correct: A

Detailed Solution

The main function of the roots of a plant is to absorb water and nutrients from the soil, which are then transported to the rest of the plant.

Study Tips

Maximize your preparation with these strategies:

[R] Review Thoroughly

Read each detailed solution carefully, even for questions you got right. The shortcuts and alternative methods will save you time on exam day.

[P] Practice Similar Problems

After reviewing, solve 2-3 similar problems on the same topic. Pattern recognition is the key to speed in competitive exams.

[S] Master the Shortcuts

The shortcuts in these solutions are battle-tested. Practice them until they become automatic. A 30-second shortcut can decide your rank.

[T] Track Accuracy & Speed

Note time per question. If a question takes more than 2 minutes, flag it. Review why it took long - was it the concept or the calculation?

[F] Focus on Weak Areas

Use the Topic Analysis to identify weak spots. Dedicate extra sessions to those topics before moving to new material.

[E] Simulate Exam Conditions

Take timed mock tests on vlymbooq. Real exam simulation reduces anxiety and builds the mental stamina needed for 2-3 hour papers.
