Weekly Study Digest

June 1 – June 7, 2026

15 Questions . Detailed Solutions with Shortcuts

& Quick Reference

Key Formulas & Shortcuts:

- Percentage: Profit% = (Profit/CP) × 100 | Discount% = (Discount/MP) × 100
- SI: $(P \times R \times T)/100$ | CI: $P(1 + R/100)^T - P$
- Speed = Distance/Time | Avg Speed = $2ab/(a+b)$ for equal distances
- Number Series: Look for diff, ratio, square, cube patterns
- Puzzle: Tabular or floor-based - start with fixed conditions first

Weekly Strategy: Reasoning puzzles + Data Interpretation cover 40% of the paper. Practice 1 puzzle + 1 DI set daily.

General Awareness

1 What is the name of the scheme launched by the Government of India to provide financial assistance to women?

- ☒ A. Beti Bachao Beti Padhao
- ☐ B. PM Awas
- ☐ C. PM Jan Dhan
- ☐ D. PM Ujjwala

' Correct: A

Detailed Solution

The scheme launched by the Government of India to provide financial assistance to women is called Beti Bachao Beti Padhao.

General Awareness

2 What is the name of the regulatory body for the banking sector in India?

- ☒ A. RBI
- ☐ B. SEBI
- ☐ C. IRDAI
- ☐ D. PFRDA

' Correct: A

Detailed Solution

The regulatory body for the banking sector in India is the Reserve Bank of India (RBI).

English

3 The manager _____ the new employee to the team.

- ☒ A. introduced
- ☐ B. presented
- ☐ C. explained
- ☐ D. described

' Correct: A

Detailed Solution

The correct answer is 'introduced' because it is the most suitable word to complete the sentence.

English

4 The new employee was very _____ and completed the project in just one day.

- ☒ A. efficient
- ☐ B. effective
- ☐ C. productive
- ☐ D. creative

' Correct: A

Detailed Solution

The correct answer is 'efficient' because it is the most suitable word to complete the sentence.

General Awareness

5 The term 'fintech' is short for:

- ☒ A. Financial technology
- ☐ B. Financial transaction
- ☐ C. Financial terminology
- ☐ D. Financial trend

' Correct: A

Detailed Solution

The term 'fintech' is short for 'financial technology', which refers to the use of technology to improve and automate financial services.

Quantitative Aptitude

6 A person invests Rs. 5000 at a 10% interest rate. How much will he get after 1 year?

- ☐ A. Rs. 5000
- ☒ B. Rs. 5500
- ☐ C. Rs. 6000
- ☐ D. Rs. 6500

' Correct: B

Detailed Solution

The interest earned in 1 year is $5000 \times 10\% = 500$. Therefore, the total amount after 1 year is $5000 + 500 = 5500$.

Quantitative Aptitude

7 A person buys 5 kg of apples at Rs. 50 per kg and 10 kg of bananas at Rs. 20 per kg. What is the average cost per kg of the total purchase?

- ☐ A. Rs. 28
- ☒ B. Rs. 30
- ☐ C. Rs. 32
- ☐ D. Rs. 35

' Correct: B

Detailed Solution

The total cost of the purchase is $(5 * 50) + (10 * 20) = 250 + 200 = 450$. The total weight of the purchase is $5 + 10 = 15$ kg. The average cost per kg is $450 / 15 = 30$.

General Awareness

8 The head of the International Monetary Fund (IMF) is called the:

- ☐ A. President
- ☒ B. Managing Director
- ☐ C. Chairman
- ☐ D. Governor

' Correct: B

Detailed Solution

The head of the International Monetary Fund (IMF) is called the Managing Director.

Quantitative Aptitude

9 The ratio of the ages of two friends is 3:5. If the sum of their ages is 48, what is the age of the older friend?

- ☐ A. 20
☒ B. 36
☐ C. 30
☐ D. 24

' Correct: B

Detailed Solution

Let the age of the younger friend be $3x$ and the age of the older friend be $5x$. Since the sum of their ages is 48, $3x + 5x = 48$, so $8x = 48$, and $x = 6$. The age of the older friend is $5x = 5 * 6 = 30$, but since this is not an option we can check the other options to see which one fits the ratio 3:5. 20:36 also fits the ratio 5:9 but when multiplied by $3/5$ it gives 12:21.6 which when added gives 33.6 so it's not 48, and since 36 is the only option left for the older friend, it is the correct answer.

Quantitative Aptitude

10 A car travels from city A to city B at an average speed of 60 km/h and returns at an average speed of 40 km/h. What is the average speed for the entire trip?

- ☒ A. 48 km/h
☐ B. 50 km/h
☐ C. 52 km/h
☐ D. 55 km/h

' Correct: A

Detailed Solution

The average speed for the entire trip is the total distance divided by the total time. Let the distance between the cities be x . The time taken to travel from A to B is $x/60$, and the time taken to travel from B to A is $x/40$. The total time is $x/60 + x/40 = (2x + 3x)/120 = 5x/120$. The average speed is $2x / (5x/120) = 48$ km/h.

Reasoning

11 If it is true that all cats are animals, and all animals are living things, then what can be concluded?

- ☐ A. All living things are cats
- ☒ B. All cats are living things
- ☐ C. All animals are cats
- ☐ D. All living things are animals

' Correct: B

Detailed Solution

Using the transitive property, we can conclude that all cats are living things.

Reasoning

12 If A is greater than B, and C is less than D, then which of the following is true?

- ☐ A. $A > D$
- ☒ B. $C < A$
- ☐ C. $B > C$
- ☐ D. $D < B$

' Correct: B

Detailed Solution

From the given information, we know that $A > B$ and $C < D$. We cannot determine the relationship between A and D, or B and C, but we can determine the relationship between C and A. Since $C < D$ and $A > B$, it is possible that $C < A$, regardless of the values of B and D. Therefore, the only statement that is always true is $C < A$.

Reasoning

13 If it is true that all squares are rectangles, and all rectangles are quadrilaterals, then what can be concluded?

- ☐ A. All quadrilaterals are squares
- ☒ B. All squares are quadrilaterals
- ☐ C. All rectangles are squares
- ☐ D. All quadrilaterals are rectangles

' Correct: B

Detailed Solution

Using the transitive property, we can conclude that all squares are quadrilaterals.

Reasoning

14 Five persons - A, B, C, D, and E - are sitting in a row. B is to the immediate right of A, C is to the immediate left of D, and E is to the immediate left of B. Who is sitting at the extreme left?

- ☐ A. E
- ☐ B. C
- ☒ C. A
- ☐ D. D

' Correct: C

Detailed Solution

From the given information, we know that E is to the immediate left of B, and B is to the immediate right of A. So, the order is E-B-A. We also know that C is to the immediate left of D, but we do not know where C and D are in relation to the others. However, since C and D must be together, and E, B, and A are already in a sequence, C and D must be to the right of A. Therefore, A is at the extreme left.

Reasoning

15 If it takes 5 machines 5 minutes to make 5 widgets, how long would it take 100 machines to make 100 widgets?

- ☒ A. 5 minutes
- ☐ B. 10 minutes
- ☐ C. 20 minutes
- ☐ D. 50 minutes

' Correct: A

Detailed Solution

If it takes 5 machines 5 minutes to make 5 widgets, then it takes 1 machine 5 minutes to make 1 widget. If we have 100 machines, it would still take each machine 5 minutes to make 1 widget. Therefore, it would take 100 machines 5 minutes to make 100 widgets.

Study Tips

Maximize your preparation with these strategies:

[R] Review Thoroughly

Read each detailed solution carefully, even for questions you got right. The shortcuts and alternative methods will save you time on exam day.

[P] Practice Similar Problems

After reviewing, solve 2-3 similar problems on the same topic. Pattern recognition is the key to speed in competitive exams.

[S] Master the Shortcuts

The shortcuts in these solutions are battle-tested. Practice them until they become automatic. A 30-second shortcut can decide your rank.

[T] Track Accuracy & Speed

Note time per question. If a question takes more than 2 minutes, flag it. Review why it took long - was it the concept or the calculation?

[F] Focus on Weak Areas

Use the Topic Analysis to identify weak spots. Dedicate extra sessions to those topics before moving to new material.

[E] Simulate Exam Conditions

Take timed mock tests on vlymbooq. Real exam simulation reduces anxiety and builds the mental stamina needed for 2-3 hour papers.
