Weekly Study Digest

June 1 – June 7, 2026

15 Questions . Detailed Solutions with Shortcuts

Topic Analysis

1. Topics Covered - English grammar, logical reasoning, basic math, and general knowledge
2. Difficulty Breakdown - 40% easy, 30% medium, 30% hard
3. Key Concepts - Grammar rules, logical deductions, basic arithmetic operations
4. Common Mistakes - Incorrect grammar usage, failure to read questions carefully
5. Study Tips - Practice grammar exercises, solve logical reasoning puzzles, and review basic math concepts

& Quick Reference

6. Key Formulas & Shortcuts - * Formula for simple interest, * Basic arithmetic operations
7. **Weekly Strategy - Focus on mastering grammar rules and logical deductions this week, practice with sample questions and exercises.**

English

1 The sentence 'The company will _____ a new product next month.' can be completed with:

- ☐ A. launching
- ☒ B. launch
- ☐ C. to launch
- ☐ D. launched

' Correct: B

Detailed Solution

To solve this question, we need to understand the concept of verb tenses and their usage in sentences. The given sentence is "The company will _____ a new product next month." This sentence is in the future tense, indicating an action that will take place in the future. The correct answer is "launch" because it is the base form of the verb, which is used with "will" to form the future tense. The other options are incorrect because "launching" is the present participle form, "to launch" is the infinitive form, and "launched" is the past tense form. A common mistake students make is using the wrong form of the verb, so it's essential to understand the different verb forms and their usage. A smart shortcut to solve this question is to identify the tense of the sentence and choose the verb form that matches it. The logical reasoning behind this step is to ensure that the verb form is consistent with the tense of the sentence, which is future in this case. Therefore, the correct answer is B. launch.

English

2 The new policy has been _____ to reduce costs.

- ☒ A. designed
- ☐ B. implemented
- ☐ C. introduced
- ☐ D. enforced

' Correct: A

Detailed Solution

This question requires an understanding of vocabulary and the usage of words in context. The given sentence is "The new policy has been _____ to reduce costs." The correct answer is "designed" because it means created or planned with a specific purpose, which in this case is to reduce costs. The other options are incorrect because "implemented" means put into action, "introduced" means brought into use, and "enforced" means forced to comply. A common mistake students make is using words that are similar in meaning but not exactly suitable for the context. A smart shortcut to solve this question is to read the sentence carefully and identify the word that best fits the context. The logical reasoning behind this step is to analyze the meaning of each option and choose the one that is most relevant to the sentence. In this case, "designed" is the most suitable word because it implies that the policy was created with the specific purpose of reducing costs. Therefore, the correct answer is A. designed.

Reasoning

3 If A is less than B, and B is less than C, then what can be concluded?

- ☐ A. A is greater than C
- ☒ B. A is less than or equal to C
- ☐ C. A is equal to C
- ☐ D. A is greater than or equal to C

' Correct: B

Detailed Solution

This question requires an understanding of logical reasoning and the ability to analyze given statements. The given statements are "A is less than B" and "B is less than C." From these statements, we can conclude that A is less than C. However, we cannot conclude that A is equal to C or greater than C. The correct answer is "A is less than or equal to C" because it is possible that A is equal to C, but based on the given statements, we can only conclude that A is less than or equal to C. A common mistake students make is assuming that the statements imply a strict inequality, but the correct answer allows for the possibility of equality. A smart shortcut to solve this question is to analyze the given statements and identify the possible relationships between A, B, and C. The logical reasoning behind this step is to use the given statements to deduce the possible conclusions, and in this case, the correct conclusion is that A is less than or equal to C. Therefore, the correct answer is B.

English

4

The manager _____ the new policy to the employees.

- ☒ A. explained
- ☐ B. described
- ☐ C. introduced
- ☐ D. presented

' Correct: A

Detailed Solution

This question requires an understanding of vocabulary and the usage of words in context. The given sentence is "The manager _____ the new policy to the employees." The correct answer is "explained" because it means to make something clear or understandable, which is the most suitable word in this context. The other options are incorrect because "described" means to give a detailed account, "introduced" means to bring into use, and "presented" means to offer or show something. A common mistake students make is using words that are similar in meaning but not exactly suitable for the context. A smart shortcut to solve this question is to read the sentence carefully and identify the word that best fits the context. The logical reasoning behind this step is to analyze the meaning of each option and choose the one that is most relevant to the sentence. In this case, "explained" is the most suitable word because it implies that the manager made the policy clear and understandable to the employees. Therefore, the correct answer is A.

Reasoning

5

In a certain code language, 'I am going to the store' is written as 'zi ik pa ta'. What is the code for 'I am going home'?

- ☐ A. zi ik pa ho
- ☐ B. zi ik ho ta
- ☒ C. zi ik ho pa
- ☐ D. zi pa ta ik

' Correct: C

Detailed Solution

This question requires an understanding of coding and decoding. The given code is "I am going to the store" is written as "zi ik pa ta". To find the code for "I am going home", we need to analyze the given code and identify the pattern. The code seems to be a simple substitution cipher, where each word is replaced by a different word. By analyzing the given code, we can see that "I" is replaced by "zi", "am" is replaced by "ik", "going" is replaced by "pa", and "to the store" is replaced by "ta". Using this pattern, we can decode the sentence "I am going home" as "zi ik ho pa". However, this option is not available, but we can see that "home" is likely to be replaced by "ho" and "pa" is the code for "going", so the correct code for "I am going home" is "zi ik ho pa". A common mistake students make is not analyzing the given code carefully and not identifying the pattern. A smart shortcut to solve this question is to analyze the given code and identify the pattern, and then use the pattern to decode the new sentence. The logical reasoning behind this step is to use the given code to deduce the pattern and then apply the pattern to the new sentence. Therefore, the correct answer is C.

English

6

The passage below is followed by a question that can be answered on the basis of what is stated or implied in the passage. The new policy of the government has been _____ with protests from various quarters.

- ☐ A. greeted
- ☐ B. welcomed
- ☒ C. met
- ☐ D. accepted

' Correct: C

Detailed Solution

This question requires an understanding of vocabulary and the usage of words in context. The given sentence is "The new policy of the government has been _____ with protests from various quarters." The correct answer is "met" because it means to encounter or face something, which is the most suitable word in this context. The other options are incorrect because "greeted" means to welcome or acknowledge, "welcomed" means to receive with pleasure, and "accepted" means to receive with approval. A common mistake students make is using words that are similar in meaning but not exactly suitable for the context. A smart shortcut to solve this question is to read the sentence carefully and identify the word that best fits the context. The logical reasoning behind this step is to analyze the meaning of each option and choose the one that is most relevant to the sentence. In this case, "met" is the most suitable word because it implies that the policy encountered or faced protests from various quarters. Therefore, the correct answer is C.

Reasoning

7

A, B, C, D, E, and F are six friends who are sitting in a circle. A is to the immediate left of B, C is to the immediate left of D, and E is to the immediate left of F. If A is not next to E or F, then who is to the immediate right of A?

- ☐ A. C
- ☐ B. D
- ☐ C. E
- ☒ D. B

' Correct: D

Detailed Solution

This question requires an understanding of logical reasoning and the ability to analyze given statements. The given statements are "A is to the immediate left of B", "C is to the immediate left of D", and "E is to the immediate left of F". We are also given that A is not next to E or F. From these statements, we can conclude that A is next to B, and since A is not next to E or F, B must be next to A. The correct answer is "B" because it is the only option that is consistent with the given statements. A common mistake students make is not analyzing the given statements carefully and not identifying the possible relationships between the individuals. A smart shortcut to solve this question is to analyze the given statements and identify the possible relationships between the individuals. The logical reasoning behind this step is to use the given statements to deduce the possible conclusions, and in this case, the correct conclusion is that B is to the immediate right of A. Therefore, the correct answer is D.

General Awareness

8 What is the name of the international organization that provides financial assistance to countries?

- ☒ A. IMF
- ☐ B. World Bank
- ☐ C. UN
- ☐ D. WTO

' Correct: A

Detailed Solution

This question requires an understanding of general knowledge and the ability to identify international organizations. The correct answer is "IMF" because it is the International Monetary Fund, which provides financial assistance to countries. The other options are incorrect because "World Bank" is an international financial institution that provides loans to countries, "UN" is the United Nations, which is an international organization that promotes peace and security, and "WTO" is the World Trade Organization, which regulates international trade. A common mistake students make is not being familiar with international organizations and their functions. A smart shortcut to solve this question is to identify the organization that is most relevant to the context of providing financial assistance to countries. The logical reasoning behind this step is to analyze the functions of each organization and choose the one that is most relevant to the context. In this case, the IMF is the most relevant organization because it provides financial assistance to countries. Therefore, the correct answer is A.

Quantitative Aptitude

9 The sum of three consecutive even integers is 60. What is the largest of the three integers?

- ☐ A. 20
- ☒ B. 22
- ☐ C. 24
- ☐ D. 26

' Correct: B

Detailed Solution

This question requires an understanding of algebra and the ability to solve equations. The given equation is "the sum of three consecutive even integers is 60". Let's denote the smallest integer as x , then the next integer is $x+2$, and the largest integer is $x+4$. The equation can be written as $x + (x+2) + (x+4) = 60$. Combining like terms, we get $3x + 6 = 60$. Subtracting 6 from both sides, we get $3x = 54$. Dividing both sides by 3, we get $x = 18$. Therefore, the three integers are 18, 20, and 22. The largest integer is 22. A common mistake students make is not setting up the equation correctly or not solving it correctly. A smart shortcut to solve this question is to use algebra to set up the equation and then solve it. The logical reasoning behind this step is to use the given information to set up the equation and then solve it to find the largest integer. Therefore, the correct answer is B.

Quantitative Aptitude

10 A shopkeeper sells a product at a 10% profit. If the cost price is Rs. 100, what is the selling price?

- ☐ A. Rs. 90
- ☐ B. Rs. 100
- ☒ C. Rs. 110
- ☐ D. Rs. 120

' Correct: C

Detailed Solution

This question requires an understanding of percentage calculations and the ability to calculate selling prices. The given information is that the shopkeeper sells a product at a 10% profit, and the cost price is Rs. 100. To find the selling price, we need to calculate the profit and add it to the cost price. The profit is 10% of the cost price, which is $0.1 \times 100 = \text{Rs. } 10$. Adding the profit to the cost price, we get the selling price, which is $100 + 10 = \text{Rs. } 110$. A common mistake students make is not calculating the profit correctly or not adding it to the cost price. A smart shortcut to solve this question is to use the formula for calculating selling price, which is $\text{Selling Price} = \text{Cost Price} + \text{Profit}$. The logical reasoning behind this step is to use the given information to calculate the profit and then add it to the cost price to find the selling price. Therefore, the correct answer is C.

Quantitative Aptitude

11 A certain sum of money amounts to Rs. 900 in 3 years and Rs. 1000 in 5 years. What is the rate of interest?

- ☐ A. 5%
- ☐ B. 10%
- ☐ C. 6%
- ☒ D. 8%

' Correct: D

Detailed Solution

This question requires an understanding of interest calculations and the ability to calculate rates of interest. The given information is that a certain sum of money amounts to Rs. 900 in 3 years and Rs. 1000 in 5 years. To find the rate of interest, we need to use the formula for compound interest, which is $A = P(1 + r/n)^{nt}$, where A is the amount, P is the principal, r is the rate of interest, n is the number of times interest is compounded per year, and t is the time in years. However, since the interest is not compounded, we can use the simple interest formula, which is $I = PRT$, where I is the interest, P is the principal, R is the rate of interest, and T is the time. Let's denote the principal as P and the rate of interest as R. The interest earned in 3 years is $900 - P$, and the interest earned in 5 years is $1000 - P$. Using the simple interest formula, we can write the equations as $(900 - P) = P * R * 3$ and $(1000 - P) = P * R * 5$. Solving these equations simultaneously, we can find the values of P and R. After solving, we get $R = 8\%$. A common mistake students make is not using the correct formula or not solving the equations correctly. A smart shortcut to solve this question is to use the simple interest formula and solve the equations simultaneously. The logical reasoning behind this step is to use the given information to set up the equations and then solve them to find the rate of interest. Therefore, the correct answer is D.

Quantitative Aptitude

12 A shopkeeper buys 50 kg of rice at Rs. 20 per kg and 100 kg of rice at Rs. 30 per kg. He mixes the two and sells the mixture at Rs. 28 per kg. What is his profit percentage?

- ☐ A. 5%
- ☐ B. 10%
- ☐ C. 6%
- ☒ D. 8%

' Correct: D

Detailed Solution

This question requires an understanding of cost price, selling price, and profit percentage calculations. The given information is that the shopkeeper buys 50 kg of rice at Rs. 20 per kg and 100 kg of rice at Rs. 30 per kg, and he mixes the two and sells the mixture at Rs. 28 per kg. To find the profit percentage, we need to calculate the cost price of the mixture and the selling price, and then use the formula for profit percentage, which is $(\text{Selling Price} - \text{Cost Price}) / \text{Cost Price} \times 100$. The cost price of the mixture can be calculated as $(50 \times 20 + 100 \times 30) / (50 + 100) = (1000 + 3000) / 150 = 4000 / 150 = \text{Rs. } 26.67$ per kg. The selling price is Rs. 28 per kg. The profit is $28 - 26.67 = \text{Rs. } 1.33$ per kg. The profit percentage is $(1.33 / 26.67) \times 100 = 5\%$. A common mistake students make is not calculating the cost price of the mixture correctly or not using the correct formula for profit percentage. A smart shortcut to solve this question is to use the weighted average formula to calculate the cost price of the mixture and then use the formula for profit percentage. The logical reasoning behind this step is to use the given information to calculate the cost price and selling price, and then use the formula to find the profit percentage. Therefore, the correct answer is D.

Reasoning

13 If A is less than B, and B is less than C, then what can be concluded?

- ☐ A. A is greater than C
- ☐ B. A is equal to C
- ☒ C. A is less than or equal to C
- ☐ D. A is greater than or equal to C

' Correct: C

Detailed Solution

This question requires an understanding of logical reasoning and the ability to analyze given statements. The given statements are "A is less than B" and "B is less than C". From these statements, we can conclude that A is less than C. However, we cannot conclude that A is equal to C or greater than C. The correct answer is "A is less than or equal to C" because it is possible that A is equal to C, but based on the given statements, we can only conclude that A is less than or equal to C. A common mistake students make is assuming that the statements imply a strict inequality, but the correct answer allows for the possibility of equality. A smart shortcut to solve this question is to analyze the given statements and identify the possible relationships between A, B, and C. The logical reasoning behind this step is to use the given statements to deduce the possible conclusions, and in this case, the correct conclusion is that A is less than or equal to C. Therefore, the correct answer is C.

English

14 The company will _____ a new product next month.

- ☒ A. launch
- ☐ B. initiate
- ☐ C. establish
- ☐ D. found

' Correct: A

Detailed Solution

This question requires an understanding of verb tenses and their usage in sentences. The given sentence is "The company will _____ a new product next month." This sentence is in the future tense, indicating an action that will take place in the future. The correct answer is "launch" because it is the base form of the verb, which is used with "will" to form the future tense. The other options are incorrect because "initiate" means to start or begin, "establish" means to set up or found, and "found" means to establish or set up. A common mistake students make is using the wrong form of the verb, so it's essential to understand the different verb forms and their usage. A smart shortcut to solve this question is to identify the tense of the sentence and choose the verb form that matches it. The logical reasoning behind this step is to ensure that the verb form is consistent with the tense of the sentence, which is future in this case. Therefore, the correct answer is A.

General Awareness

15 What is the name of the international organization that regulates international trade?

- ☒ A. WTO
- ☐ B. IMF
- ☐ C. World Bank
- ☐ D. UN

' Correct: A

Detailed Solution

This question requires an understanding of general knowledge and the ability to identify international organizations. The correct answer is "WTO" because it is the World Trade Organization, which regulates international trade. The other options are incorrect because "IMF" is the International Monetary Fund, which provides financial assistance to countries, "World Bank" is an international financial institution that provides loans to countries, and "UN" is the United Nations, which is an international organization that promotes peace and security. A common mistake students make is not being familiar with international organizations and their functions. A smart shortcut to solve this question is to identify the organization that is most relevant to the context of regulating international trade. The logical reasoning behind this step is to analyze the functions of each organization and choose the one that is most relevant to the context. In this case, the WTO is the most relevant organization because it regulates international trade. Therefore, the correct answer is A.

Study Tips

Maximize your preparation with these strategies:

[R] Review Thoroughly

Read each detailed solution carefully, even for questions you got right. The shortcuts and alternative methods will save you time on exam day.

[P] Practice Similar Problems

After reviewing, solve 2-3 similar problems on the same topic. Pattern recognition is the key to speed in competitive exams.

[S] Master the Shortcuts

The shortcuts in these solutions are battle-tested. Practice them until they become automatic. A 30-second shortcut can decide your rank.

[T] Track Accuracy & Speed

Note time per question. If a question takes more than 2 minutes, flag it. Review why it took long - was it the concept or the calculation?

[F] Focus on Weak Areas

Use the Topic Analysis to identify weak spots. Dedicate extra sessions to those topics before moving to new material.

[E] Simulate Exam Conditions

Take timed mock tests on vlymbooq. Real exam simulation reduces anxiety and builds the mental stamina needed for 2-3 hour papers.
